1.2 CVCe Words – Split Diagraphs

1 CVCe Words

1.2 Split digraphs

Today, we are going to learn about a special kind of words called 'CVC + e words'.

First, let's break down what CVC + e means. 'CVC' stands for consonant-vowel-consonant. It means that we have three letters in a row, with the first letter being a consonant, the second letter being a vowel, and the third letter being another consonant. For example, cat is a CVC word because it has the consonant 'c', the vowel 'a', and the consonant 't'.

Now, let's move on to the '+ e' part. The '+ e' means that we add an 'e' at the end of a CVC word to change its sound. This 'e' is very special because it works like a magic wand and transforms the vowel sound in the middle of the word.

For example, let's take the CVC word tap. When we add the magic 'e' at the end, it becomes tape. Do you see how the 'a' in tap changes to a long 'a' sound in tape? The 'e' makes the vowel say its own name!

We can find lots of other examples of CVC + e words. Let's try a few more:

'hop' + 'e' = hope (The 'o' in 'hop' changes to a long 'o' sound in 'hope'.)

'win' + 'e' = wine (The 'i' in 'win' changes to a long 'i' sound in 'wine'.)

'cap' + 'e' = cape (The 'a' in 'cap' changes to a long 'a' sound in 'cape'.)

If you want to make it more fun, you can play a game with your classmates. Write down CVC words on one side of the board and take turns adding the magic 'e' to make it a CVC + e word on the other side. It's like a word magic show!

The "magic e" changes the sound of the vowel from a short sound to a long sound.
